

From a landlord's perspective it pays for itself to encourage tenants for little power and water as possible. The landlord may be charging a designated rate for utilities so its plain that they want into your market from the utility company to be as little as possible. Even if they don't charge a designated rate, as soon as the utilities usage decreases it signifies that the amenities are also getting used less. When they get used less they break less and so in the end could save a landlord a good fortune.
