

How to open WebMail on mobile phone

Our WebMail also works fine on mobile devices (phone and tablets and TV box)

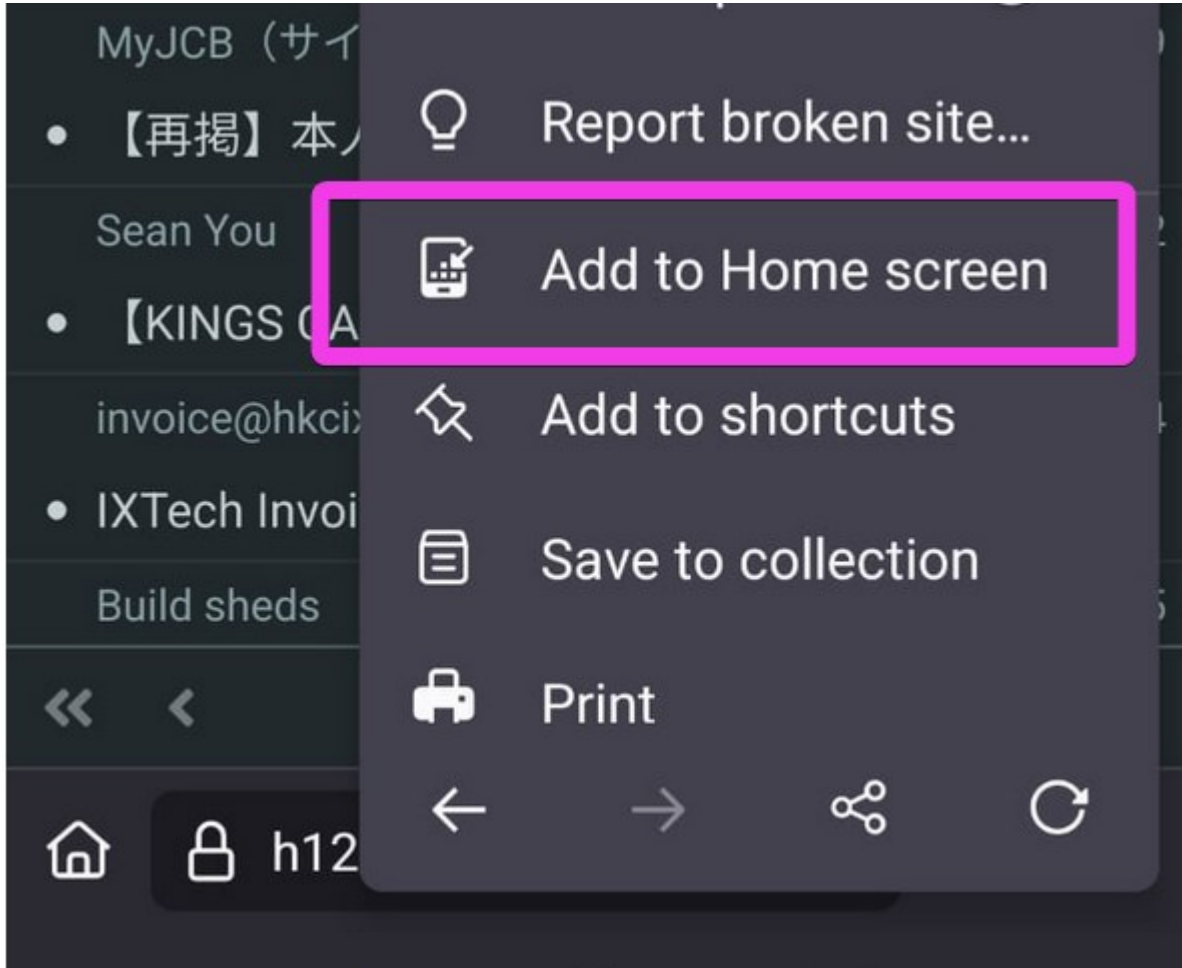

Use the same method to login

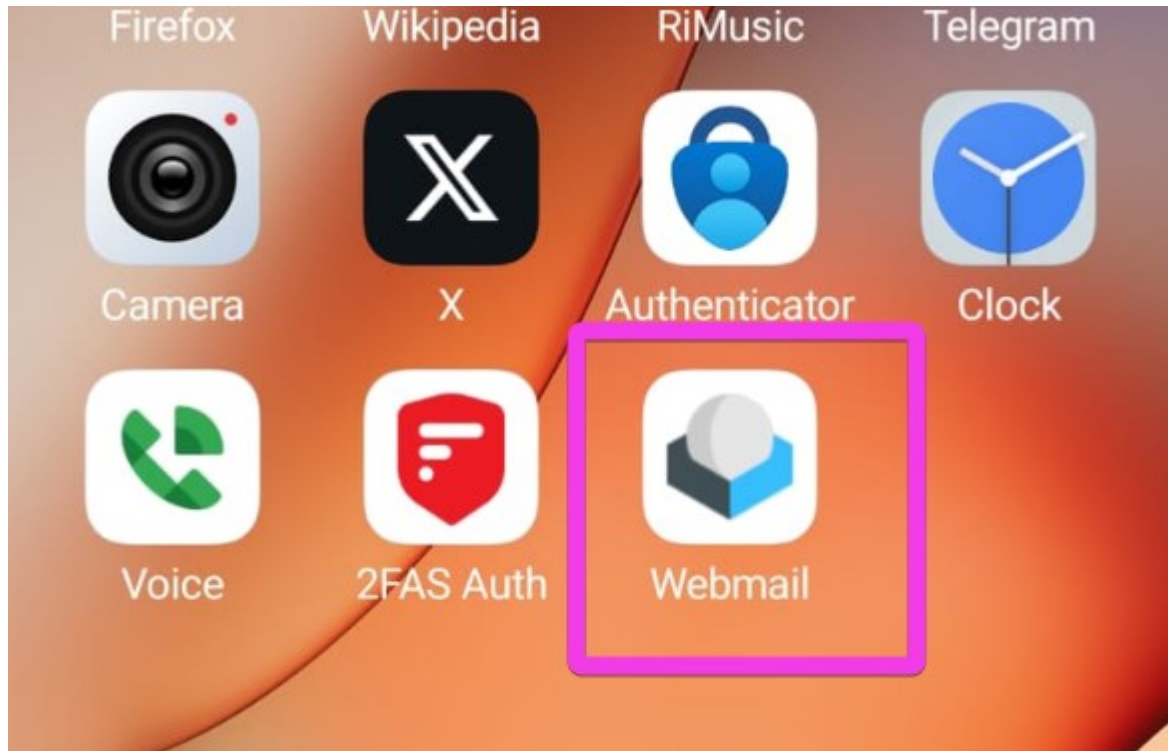

- open sxl.net/app in a browser, click WebMail,
- login with your email address and password, save your password on private phone.

Most browser offer an “Add to Home Screen” option in it's menu

- this is an example from Firefox for Android, but other browser have similar function (but different wording)

After add to home screen, it act like a normal phone app.
