How to setup my phone email?

- There are too many kinds of phone. I cannot remotely control your phone. you are on your own.
- But the principle is the same
- First, open the setting page of email.
- you must change BOTH "Incoming Mail Server" and "Outgoing Mail Server"
- Find the "Incoming Mail Server", change it to `h12.hksx.com`
  - Input your email address and password.
  - No need to change settings like Port or SSL, use the default.
- Find the "Outgoing Mail Server", change it to `h12.hksx.com`
  - Input your email address and password.
  - No need to change settings like Port or SSL, use the default.
- Try to send yourself an email. If you can receive it, it is done.

Common problems

- Please do NOT ask me where is your Email Setting page, every phone is different. I cannot answer you.
- If connection failed, and you were asked to input password. Please try login to WebMail, just to make sure your password is correct.
- If connection failed, but you were not asked to input password. Please try to change connection method
