

Migrate Outlook accounts to new email server

Outlook setup 自己設置Outlook

- 不懂的不要自己做，下載Rustdesk或Anydesk, 我可以幫你做.
- If you don't know how to change, do not do it yourself, Please download Rustdesk or Anydesk, I will help you.

*** 重要!!! ***

在Outlook裡，如果之前賬號是IMAP類型，不是改了服務器名稱和密碼就可以（這樣會損失所有已下載郵件）。
要添加一個新賬號，然後把舊賬號裡的郵件拖拉到新賬號裡。完成一次 傳送及接收，最後才刪除舊賬號

*** IMPORTANT!!! ***

In Outlook, If existing account is IMAP type. DO NOT simply change the server name and password, you will lost all existing emails.
You must add a new account in Outlook, and then manually drag-and-drop all existing emails to the new mailbox, complete Send/Receive once, and then finally delete the old mailbox.

- please use SSL first. Try other methods if SSL does not work.
- 建議使用SSL, 如用不了SSL, 請試試其他方式.

Incoming mail server 內送郵件服務器

- server name: h12.hksx.com
- POP3 use port 110 (No-SSL) or 995 (SSL)
- IMAP use port 143 (No-SSL) or 993 (SSL)

Outgoing mail server 外寄郵件服務器

- server name: h12.hksx.com
- port 465 (SSL)
- port 587 (STARTTLS)
- port 25 (No SSL)
