

How to setup email on iphone (advanced settings)

Change connection SSL and Ports

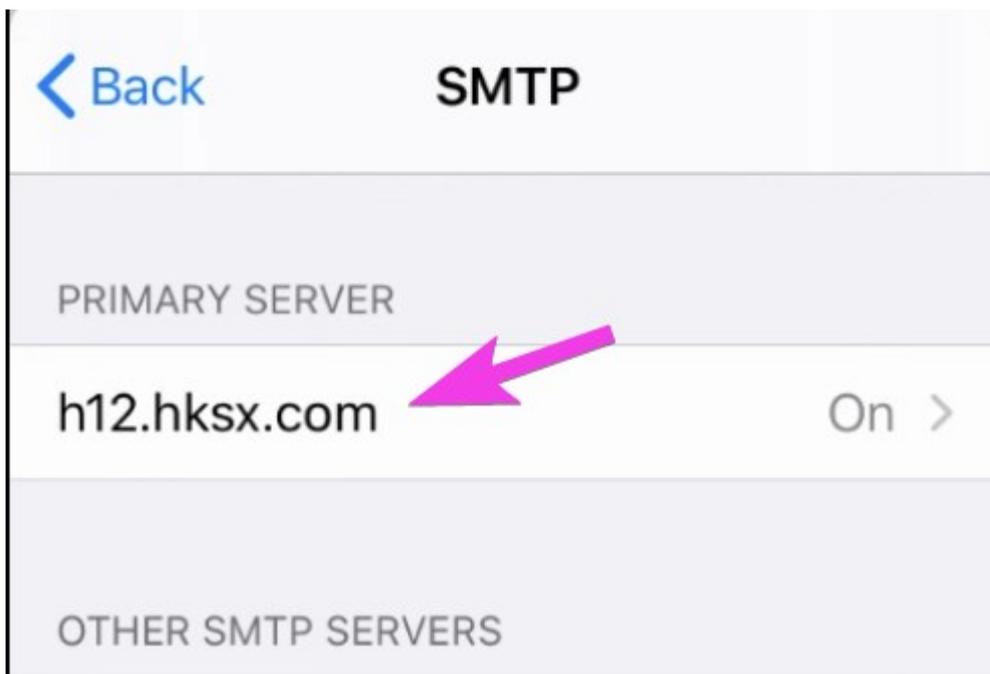

- Most user don't need to do this
- Open Settings > Passwords & Account
- Tape the account you want to change

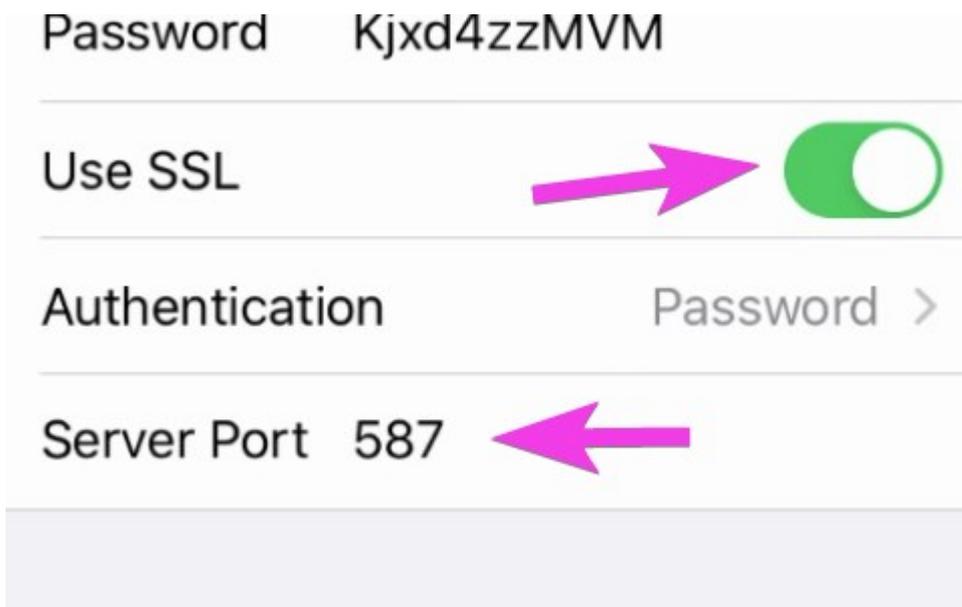

- Tap SMTP server

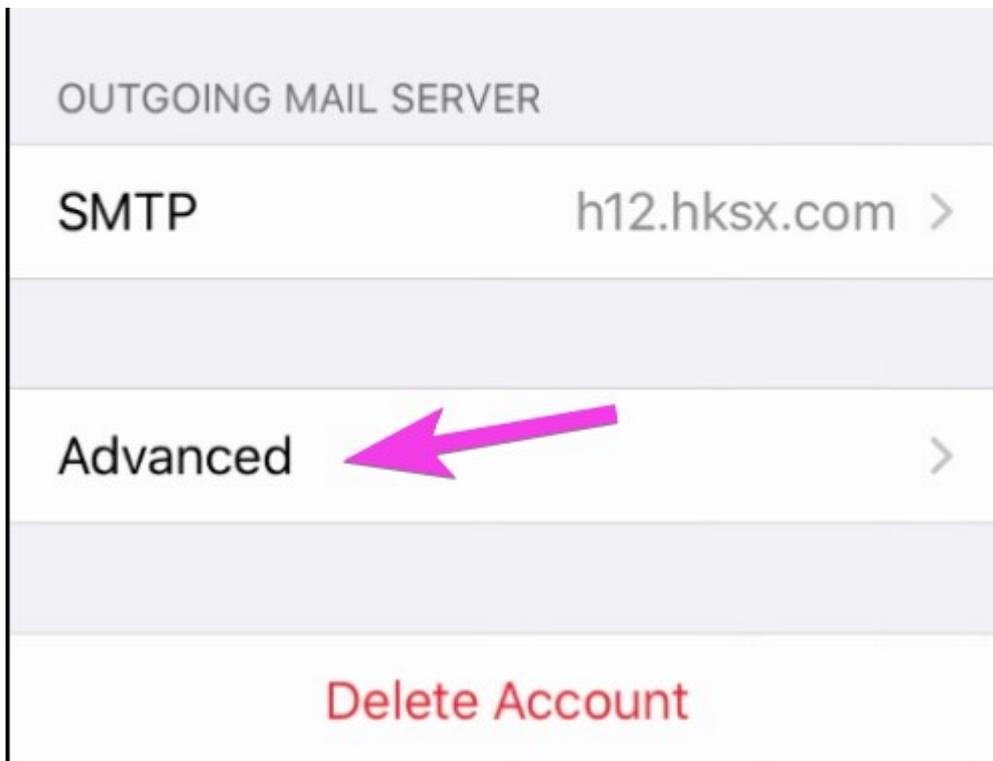

- Tap Primary server

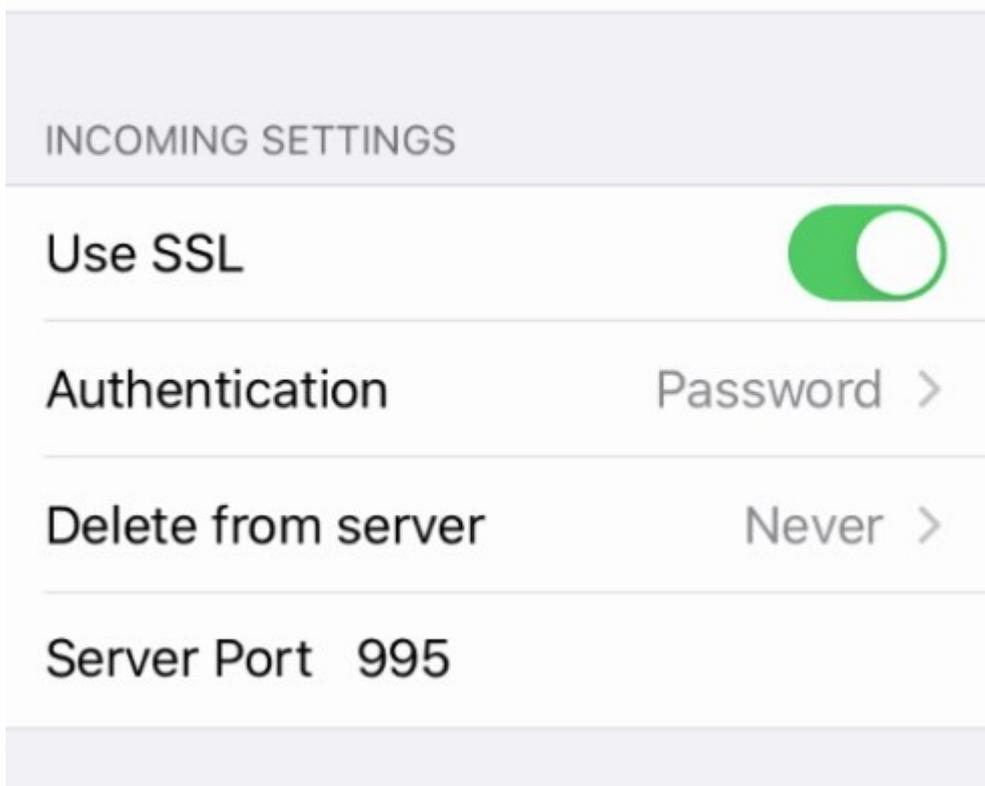

- Turn on SSL and change Server Port to 587
- This is an example only, you may need to try different settings.
 - see * [h12_mail_server_connection_methods](#)

- Go back to the previous mail account page
- click Advanced

- Change the Incoming settings
- This is an example only, you may need to try different settings.
 - see * [h12_mail_server_connection_methods](#)
- POP server should look like this

- IMAP server should look like this

INCOMING SETTINGS

Use SSL

Authentication Password >

IMAP Path Prefix /

Server Port 993
