## How to setup my phone email?

- There are too many kinds of phones. I cannot see your phones. You must do it yourself.
- If you use Iphone, please read this how to setup email on iphone
- No matter which phone, the principle is the same
- you must change BOTH "Incoming Mail Server" and "Outgoing Mail Server"
- Find the "Incoming Mail Server", change it to h12.hksx.com
  - o Input your email address and password.
  - No need to change settings like Port or SSL, use the default.
- Find the "Outgoing Mail Server", change it to h12.hksx.com
  - Input your email address and password.
  - No need to change settings like Port or SSL, use the default.
- Try to send yourself an email. If you can receive it, it is done.

## **Common problems**

- Please do NOT ask me where is your Email Setting page, every phone is different. I cannot answer you.
- If connection failed, and you were asked to input password. It means your password is wrong.
  - Please try login to WebMail, to make sure your password is correct.
- If connection failed, and you were \*not\* asked to input password. It means your phone cannot connect to the server.
  - Please try to change connection method
- You can also use one of below methods to read email on phone:
  - o how to open webmail on mobile phone
