# How to open WebMail on mobile phone

Our WebMail also works fine on mobile devices (android, iphone, ipad, tablets, TV box, etc.)
Use the same method to login

- Open a browser
- type `sxl.net/app` in the address bar
- Click WebMail
- Login with your email address and password
- Save your password on private phone.

Most browser offer an "Add to Home Screen" option in it's menu

- this is an example from Firefox for Android, but other browser have similar function (probably different wording)

After add to home screen, it act like a normal phone app.
