Migrate email on mobile phone, mac, ...

Since there are too many different devices, languages, versions out there, We cannot make tutorial for each of time.
But the principle is the same:

1. find out Incoming and Outgoing server name, change both to h12.hksx.com.
2. change the password to new one.
3. try send/receive one email to yourself, it is done if successful.
4. if not successful, try change the POP3/IMAP/SMTP connection method to one of the followings:

Incoming mail server 內送郵件服務器

- server name 服務器名稱: h12.hksx.com
- POP3 use port 110 (No-SSL) or 995 (SSL)
- IMAP use port 143 (No-SSL) or 993 (SSL)

Outgoing mail server 外寄郵件服務器

- server name 服務器名稱: h12.hksx.com
- port 465 (SSL)
- port 587 (STARTTLS)
- port 25 (No SSL)
